

# FLOAT OR SINK?

## Objectives:

See how water interacts with nature!

## Materials:

A container filled with water  
Outdoor items

## Directions:

1. Go on a walk! As you walk, pick up natural items outside that catch your interest!  
ex. leaves, twigs, rock
2. Fill your container with water
3. Guess which items will sink or float
4. Put your items into the water and see if your prediction was correct!

## Questions:

1. Were you surprised with what you found?  
What items surprised you?
2. Why did some items float and some sink?
3. Where may you find these items in water outside?
