

Stormwater Level of Service

Jurisdiction	Clean single family residential driveway pipes in the right of way	Repair single family residential driveway pipes in the right of way	Stabilize eroding natural streambanks on private property	Maintenance of constructed stormwater systems on private property
Athens-Clarke	No	No	No drainage improvement agreements have involved streambank stabilization on State waters since 2005 when Chapter 5-5 was enacted. At least one SPLOST Areawide Stormwater Management Plan project included streambank stabilization. That project alleviated flooding on Lumpkin Street and outlet to a live stream off of Catawba Ave. The receiving stream was stabilized.	On a case by case basis, costs are shared with single family residential property owners through drainage improvement agreements. These agreements were originally called Standard Drainage Contracts and are contained in PW-002. This document was approved by M&C in 1992 and is referenced in Chapter 5-5.
Augusta	Yes	Case by case basis depending on how it affects public right of way. No written policy.	No	No
Columbia County	No	No	No	Not unless easement dedicates maintenance responsibility to County
Dougherty County	Yes - on a request basis	Provide labor for pipe replacement when owner purchases the pipe	No	No
Floyd County	Yes	Yes. Reinforced concrete pipes are required for new driveways. The property owners pay for that pipe and installation. After that, any needed repairs or replacements are done by the County.	No. Beaver dams may be removed if they are causing a problem to public infrastructure.	Only in the case that it is causing a problem with public infrastructure.
Gainesville	Yes	No	No	No
Gwinnett County	Yes - if requested by the homeowner or if it affects the right of way.	Yes	Provide rock in the right of way if there is a place to put it	Not unless easement dedicates maintenance responsibility to County. Provide rock in the right of way if there is a place to put it.
Moultrie	Yes	Will install new pipe per their time schedule if the owner provides the pipe. If a new pipe is not needed they will repair the pipe.	Yes - but it is hardly every needed. There are only a couple of perennial/live streams and this is in a different geographic part of the State than the Piedmont. The streams in Moultrie have wide floodplains and relatively stable banks. Other than bridges, there is no construction close to the streams.	Yes
Oakwood	Yes	No	No	No
Peachtree City	Case by case basis	Case by case basis depending on how it affects public right of way. No written policy.	No	Not unless easement dedicates maintenance responsibility to City
Rome	No (concerned it would damage the pipe)	No	No	No
Roswell	No	No	Provide one tandem load of rip rap to right of way	Provide one tandem load of rip rap to right of way
Saint Marys	No	No	No - believe this would be a gratuity	Not unless easement dedicates maintenance responsibility to City
Savannah	Yes	No	No. Savannah is not in the same geographic region as Athens-Clarke County. There are not many streams. There is tidal erosion, but Savannah has not stabilized this type of erosion on private property.	No

Stormwater Level of Service

Valdosta	Yes	No	No - only offer staff guidance	No
Walton County	On an as-needed basis	Yes in cases when the driveway pipe was permitted	No	Not unless easement dedicates maintenance responsibility to County
